STORAGE SOLUTIONS

ECONOMIC AND SECURE STORAGE SOLUTIONS

Storage Containers

Our anti-vandal steel containers are available for hire nationwide and offer safe storage solutions to help combat theft and vandalism to tools and materials.

Each secure storage container is fitted with what we consider to be the best locking system of any UK steel container store.

Features of our storage containers include:

- Secure 10 lever locking system exclusive to Elliott (no need for padlocks)
- Double doors for easy access of larger items
- Steel ramps available for safe placement of heavy items
- Option of portable racking to increase effective storage space
- Peace of mind knowing your items are stored safely and securely
- Choice of sizes available

Our energy saving option compliments the range and comes fully insulated to reduce condensation, has PIR lighting and an external power connection.

Whatever your storage problem, Elliott have the perfect solution, to protect everything from school sports equipment, office archives and surplus retail stock, to building materials and power tools on a construction site.

Docustore®

The Elliott Docustore® has been purposely designed to help organisations with inadequate archive storage or to house valuable documentation during building works or a refurbishment.

These portable archive storage buildings are readily available for delivery from our hire centres nationwide.

- Building size of 6m x 2.4m (20' x 8') easily located at most premises
- Enough storage space for the contents of 37 four drawer filing cabinets
- Fixed and adjustable racking fitted to meet your storage needs
- Ramp provided with anti-slip surface with load rating of 350kg
- Door fitted with high security cylinder Eurolock
- Coldwatcher 1kw heater to provide anti-frost environment
- Drop down tables provided for convenient work surfaces
- Rodent proof ventilation

Flat-Pack Warehousing

Are you looking for a simple storage building that is quick and easy to install, is totally flexible in size and has large access doors for storing large or bulky items?

Then our Elliott Batex building is the perfect storage solution. Our Batex storage system has high ceilings to maximise space and offers greater flexibility than traditional storage facilities.

- Large doors for easy access of large items
- Separate pedestrian door
- Creates ideal covered workshop
- Natural light created by transparent sheets
- Additional wall roof lighting
- Can be supplied with or without insulation
- Delivered flat-packed to optimise on low transportation costs
- Assembled from foldable cells for easy installation with fast set up
- Choice of sizes to meet your requirements
- Available to purchase for delivery nationwide

NB please note that this product is not available for hire

The Battery Bank is the safe and economical solution for charging your power tools and mobile phones.

This bank of 10 lockers offers individual charging facilities for your workers in a tidy and secure environment where items may be at risk if left unsupervised. It also removes the risk of over-loading extension leads, leading to potential fires and trip hazards from unsightly cables.

Elliott Self Store

Do you have a storage problem but have no space on your site?

With Elliott Self Store you can store your items on one of our selected storage sites.

- High Security - facilities are manned and benefit from 24 hour CCTV surveillance
- Easy Access - Unlimited access during opening times, own key supplied
- Unload directly from your vehicle into your designated container
- Available in three sizes and with racking and shelving

Self Store Freephone number - 0800 389 7565
